Languages | Python, Ruby, JavaScript (ES6, AJAX, JSON), HTML, CSS, SQL

Operating Systems | Mac OS X, Linux

Frameworks/Libraries | Flask, React, jQuery, Bootstrap, Milligram, Chart.js

Database/Tools | PostgreSQL, Git, GitHub, Command Line

OBJECTIVES

Looking for an entry-level engineering role in a company where my love for problem solving within a team and producing technology that is more user intuitive is a main focus.

PROJECTS

All Projects deployed and available upon request

Daily | Calendar application built with React on a Flask RESTFUL API. User trends displayed graphically with Chart.js. Database built for future expansion of code capacity. Application offers a personal calendar that enables users to summarize their emotions daily and display at a glance trends of emotional well being.

Tech Stack: PostgreSQL, SQLAlchemy, Python, Flask, React, Javascript, Ajax, Chart.js, Unittest

Notebook | A one page dynamic notebook application. Built on a Flask RESTful API. Allows a user to create, edit, reorganize, and delete notes. Sign-In with Facebook.

Tech Stack: PostgreSQL, SQLAlchemy, Python, Flask, Javascript, jQuery, Ajax, OAuth2, Unittest

Personal Website | A one page, responsive, static, React application. This personal website features my own resume information, but is built in compartmentalized code that can be quickly transformed to host any user's personal website! Built to feature the beauty of React and reusable code.

Tech Stack: Javascript, React, Milligram

EXPERIENCE

Acupuncturist Gordon Medical Associates:

Santa Rosa, CA - 2014-2016

Produced educational presentations for physician and nurse teams

Problem solving within the confines of patients physical capacities

Produced educational literature for patients to explain medical information

2015-2016 patient Acupuncturist and Herbalist.

Meditation Instructor/Acupuncturist/Owner Second Arrow Healing:

Petaluma, CA - 2014-2016

Created content for monthly educational newsletters and advertising.

Wrote and taught meditation classes and workshops.

Created specialized treatment protocols for patients using herbs, meditation, and acupuncture.

EDUCATION

Hackbright Academy - Software Engineering Fellowship (2016)

Accelerated, 12-week, San Francisco software engineering program for women

New England School of Acupuncture - MAcOM (2011-2014)

Passionate about learning where there are overlaps and divergences between Western and Eastern sciences

Hamilton College - B.S. Theoretical Mathematics (2002-2006)

For a love of learning logical thinking and abstract problem solving
